

I have followed the commission and am pained by the monopolies that have been created in the distribution of Media (esp radio and TV). At the same time the comission continues to obscure Telecom in a legal/regulatory purgatory. Please: 1) step it up in your oversight regarding the concentration of the Media, and 2) Makes some decisions regarding telecom, preferably without being a servant to the RBOCs. The courts have a cottage industry as a result of the FCC. That's wrong.
